Problem Statement (Customer Problem Statement Template)

Analysis :

The current customer support operations at TheChaiShop&Co face inefficiencies across three key stakeholder groups — support agents, support managers, and customers — all stemming from the lack of an intelligent, centralized support system.

Support agents struggle to resolve cases quickly because replies are drafted manually and case prioritization lacks consistency, leading to excessive time spent on response preparation. This leaves agents feeling overwhelmed and reduces their overall productivity.

Support managers face difficulty monitoring day-to-day operations, as there is no centralized system to track case status or agent performance. This absence of real-time visibility leaves managers concerned and unable to make timely, data-driven decisions.

Customers, in turn, experience delayed and inconsistent support responses, since cases are processed manually without any intelligent assistance. This results in frustration and dissatisfaction, ultimately affecting customer trust and retention.

Together, these three problem statements highlight a common underlying issue: the absence of automation and centralized intelligence in the support workflow. This creates a cascading effect — inefficiency at the agent level leads to poor visibility for managers, which in turn results in poor service quality for customers. Addressing this gap through an AI-powered ticket support system can streamline case handling, enable centralized monitoring, and ensure faster, more consistent support delivery.

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Support Agent	Resolve customer support cases quickly	Case handling and response preparation take too much time	Replies are written manually and case prioritization is inconsistent	Overwhelmed and less productive
PS-2	Support Manager	Monitor support operations	It is difficult to track case status and agent performance efficiently	There is no centralized monitoring	Concerned and unable to make timely decisions
PS-3	Customer	Receive timely and accurate support for reported issues	Support responses are often delayed and inconsistent	Cases are processed manually without intelligent assist	Frustrated and dissatisfied

Problem Statement Analysis - TheChaiShop&Co Support Operations

PS ID	I am (Role)	I'm trying to...	But...	Because...	Which makes me feel...
PS-1		Resolve customer support cases quickly	Case handling and response preparation take too much time	Replies are written manually and case prioritization is inconsistent	
PS-2	 Support Manager	Monitor support operations	Reports are centralized delayent	There is no centralized monitoring	Concerned and unable to make timely decisions
PS-2		Monitor support operations	It is difficult to track case status and agent performance efficiently	There is no centralized monitoring	
PS-3	 Customer	Receive timely and accurate support for reported issues	Support responses are often delayed and inconsistent	Cases are processed manually without intelligent assist
