

Project Design Phase
Solution Architecture

Date	30 June 2026
Team ID	
Project Name	AI Powered Customer Ticket System
Maximum Marks	4 Marks

Solution Architecture:

Architecture Layers

Presentation Layer – Salesforce Lightning Experience

Provides an intuitive user interface for support agents, managers, and administrators to manage customer support operations.

Application Layer – Salesforce Flows, Prompt Builder & Agentforce

Implements business logic including case automation, SLA calculations, AI-generated replies, email notifications, and Agentforce actions.

Data Layer – Standard & Custom Objects

Stores business data using Salesforce standard objects (**Account, Contact, Case**) and custom objects (**Support Category, SLA Policy, AI Feedback**).

Analytics Layer – Reports & Dashboards

Provides real-time monitoring of case status, agent performance, SLA compliance, and overall support operations through reports and dashboards.

Solution Architecture – AI-Powered Customer Support Ticketing System
